

Measure 4 (Initial and Advanced): Ability of completers to be hired (in positions for which they have prepared.)

Evidence B: Graduation Rates licensed and provisional licensed and hired

Explanation: The following table represents the graduation rates of Newberry college teacher Education students. However, the table tracks the graduation of program completers in education majors. This data set therefore does not track students through the various gateways to graduation. This will be amended going forward and a true graduation tracking table will be utilized through the various gateways to program completion. As mentioned previously South Carolina now allows for an initial provisional licensing which has decreased the number of students completing Praxis II and Praxis PLT tests prior to being hired. This is the reason for the reduced number of fully licensed individuals. The individuals in all years who are not hired did not seek employment. Completed Data coming.

Graduating Rates-Newberry College

Cohort Year	Completers	Percent Graduating	Licensed	Provisional licensed	Hired
2021-2022	26	100%	14		23

** In Spring of 22 two students returned to their home states so we do not a record of if they are teaching or not and 1 student decided not to teach and is working in the insurance field.
